

## Registration Details

Pre-registration required. Visit [kidsquestmuseum.org](http://kidsquestmuseum.org) for registration information. Please contact the museum if your child has any physical or learning disabilities that we should know about, so we may better accommodate your camper. No refunds will be rewarded after June 1. No refunds will be awarded to campers who are "no shows" (do not attend camp and do not notify the camp office of their cancellation prior to June 1). Refunds are not issued if a child is dismissed due to disciplinary action. KidsQuest Children's Museum and The Bear Creek School reserve the right to cancel programs or sessions based on insufficient enrollment. In this event, a full refund for the specific camp will be issued.

### Scholarships

Limited scholarships are available for families in financial need. Scholarships are only available for Explorer and Adventure Camps. Visit [kidsquestmuseum.org](http://kidsquestmuseum.org) or call 425.637.8100 for more information. Priority is given to applications submitted by April 1, 2017.

# KidsQuest summer camps

Science & STEAM Camps  
(Science, Technology,  
Engineering, Art, &  
Math) for 3 year  
olds to 3rd  
graders!

## Explorer Camps Ages: 3 - 5 years

- Science Explorers I** - June 19-23 - Half Day
- Science Explorers II** - July 17-21 - Half Day
- Science Explorers III** - August 21- 25 - Half Day

Get ready to experiment! Join your fellow budding scientists as we become junior biologists, chemists, physicists, paleontologists, and geologists! Explore scientific tools like microscopes and pipettes, experiment with chemical reactions, and observe the wonders of the natural world.

*New projects and experiments each session.*

- Art Explorers** - July 31 - August 4 - Half Day

It's time to get creative and embrace the mess! We'll create our own masterpieces while getting hands-on experience with lots of fun tools and materials. Experiment with clay, paint, wire, and more.

- Nature Explorers** - August 28 - September 1 - Half Day

Learn about the amazing wonders that can be found in your own backyard. We will become nature detectives as we uncover the secrets of plants, animals, water, trees, and bugs.

## Adventure Camps Ages: 6 - 10 years

- Electric Art Camp with BAM** - June 26-30 - Full Day

Start your morning at KidsQuest as we explore circuits and automata, and how these create art pieces that move. Dive into the science behind the art before heading out to the Bellevue Arts Museum. There you will get inspiration from art exhibitions, experiment with art materials, and make many projects throughout the week. *Campers will need to be dropped off at KidsQuest and picked up at BAM each day.*

- Amusement Parks with Bricks4Kidz** - July 10-14 - Full Day

Each morning with a Bricks4Kidz instructor you will build a new mini ride as we use LEGOs and motors to make things spin, roll, and rock! Then, design your own motorized models that maximize the thrill of an amusement park as you master engineering skills. Spend the afternoon with a KidsQuest Educator, exploring the physics of the rides you love and understand how a ferris wheel spins into action.

- Stop Motion Commotion** - July 24-28 - Half Day

Lights! Camera! Action! Explore stop motion animation as you create your own mini-movie. Begin your directorial debut by starting with the creation of story and character development. Learn to use creative camera techniques, frame-by-frame image capturing, video editing, and more! Your movie will appera on KidsQuest's YouTube station to share with friends and family.

- Remote Controls with Bricks4Kidz** - August 7-11 - Full Day

Mornings are made for moving with a Bricks4Kidz instructor! See your creations in motion using LEGO® wireless remote controls. Each day, you will use fascinating and challenging LEGO® components to create dynamic vehicles, inventions, machines and more. As you enjoy the fun of building, you will understand the basic working principles of many ingenious devices that are part of our everyday lives. In the afternoon you will join a KidsQuest Educator to further explore the inner workings of all the controls that make our world run.

- Science Squad** - August 14-18 - Half Day

Step into the KidsQuest laboratory as we create substances that bubble, fizz, and pop! It's your chance to channel your inner scientist. Explore the chemistry behind gooey polymers and glow-in-the-dark phosphors. Create your own new potion and learn the differences between acids and bases.

**Location:** KidsQuest Children's Museum  
1116 108th Ave NE Bellevue, WA 98004

**Half Day Camp:** 9am-12pm  
Age 3-5\* or 6-10 | \$200

**Full Day Camp\*\*:** 9am-4pm  
Age 6-10 | \$390

*\*Campers must be able to use the restroom independently.*

## STEAM Camps Ages: 4 years old - 3rd grade

KidsQuest STEAM Camp is taking over the playground, the art studio, the science lab.... the entire Bear Creek School's Valley Campus! Each week we'll explore Science, Technology, Engineering, Art, and Math through fun, hands-on activities. We'll develop 21st century skills as we learn through play like only KidsQuest Children's Museum knows how!

- Extreme Engineering** - July 10-14 - Half or Full Day

Engineering gets extreme as materials get super small, super massive, or super powered with hydraulics! Learn about the specialized tools used by nanoscientists, attempt giant engineering challenges, and use the science of hydraulics to create an animal elevator or a super hero scissor lift!

- Mad Science** - July 17-21 - Half or Full Day

Eureka! It's your chance to channel your inner mad scientist. Explore the chemistry behind gooey polymers and glow-in-the-dark phosphors. Take apart computers to find out what makes them work, and get creative as we melt household objects to create art!

- Invent It!** - July 24-28 - Half or Full Day

Want to design the toys and technology of the future? We'll hone our inventive minds as we create adorable drawing robots, explore the science of circuits, build machines using hydraulics, and design safe transportation for eggs!

- Fantastic Forces** - July 31 - August 4 - Half or Full Day

Science gets moving as we explore fabulous physics! Build a jiggling wiggling robot, take a giant Spirograph for a spin, and use a revolving paint centrifuge. Then test your design skills as we construct flying contraptions for the KidQuest wind chamber and engineer wild mini roller coasters!

- Tinker Thinkers** - August 7-11 - Half or Full Day

Put on your thinking cap as we tinker and create! Have you ever wondered what's inside a computer or a phone? Take them apart to discover how they work, then use the parts to construct your own creations. Explore the art of monotype printing, design and test air powered rockets, and more!

- Science Goes Wild** - August 14-18 - Half or Full Day

Explore the wonders of nature as we learn about local critters, get a microscopic view of plants, and harness the forces of the natural world! Experiment with the colors of the rainbow and create art using plant pigments. We'll also become eco engineers as we design wind cars and build recycled structures!

**KidsQuest Summer Camps offer fun and learning through science experiments, arts and crafts, collaboration, and exploration!**

**Location:** Bear Creek School Valley Campus  
19315 NE 95th St, Redmond, WA 98053

**Half Day Camp:** 9am-12pm  
Age 4 - 3rd Grade | \$200

**Full Day Camp\*:** 9am-4pm  
Grades K-3 | \$390
